To whom it may concern,

I am applying for the position of Machine Learning Engineer. My CV and resume with detailed experience is available with the QR codes at the bottom of this letter. Based on the job description, I am interested in hearing about your company since I have previous work experience in automation of machine learning lifecycle workflows implementing toolsets to manage volatility in large datasets with a high volume of transactions. If you have a moment, I would love to ask you more questions around the toolsets and type of projects I might be running if hired.

And, if you have any questions about my resume, feel free to reach out over email, LinkedIn, or call me directly at my phone number.

Hope to hear from you soon,

Jordan Winemiller
